Cinderella Comfort

The market's most efficient and environmentally friendly incineration toilet

- Our most technologically advanced solution
- Eco-friendly
- Only ashes remain
- Hygienic
- 3-year warranty

$ 3 800

About the product

Our waterless incineration toilet Cinderella Comfort is Cinderella Eco Group's latest concept for cabins and holiday homes, renowned for its sustainable and environmentally friendly design and performance, with no polluting emissions. Comfort comes with a closed air system, which creates a better indoor environment and doesn't affect the temperature of the room where the toilet is installed. Cinderella Comfort also comes with an LCD display that shows notifications and status at all times.

fresh air for the incineration process is supplied via a separate air pipe, which provides a significantly better indoor climate. This prevents the room temperature from dropping and avoids conflicts with other air-dependent installations such as kitchen ventilation fans, fireplaces and wood-burning stoves.

Cinderella's incineration toilets incinerate urine and excrement at a high temperature, leaving only a small amount of ash. Four people using the toilet for a week will only produce about one teacup of ash. With Cinderella incineration toilets, you can avoid the major costs and strict regulations associated with connecting to the sewage system, and you can enjoy nearly the same comfort and convenience as at home. Since our toilets don't require a connection to water and sewage systems, they can be installed in vulnerable natural areas. Cinderella is a total sewage solution, in that it gets rid of all toilet waste. And, it doesn't have to be transported elsewhere, as required by other toilet systems.

If you are not connected to the power grid, we offer an option that uses a combination of propane and a 12V power supply, Cinderella Gas, perfect for cabins,

hygienic and clean, compared to other options. Lift up the lid and seat. Place an original Cinderella toilet bag in the bowl and put the seat back down. Use the toilet as normal and put the lid down when you are done. Press the “flush button” and the bag is released into the combustion chamber. The toilet is now ready for use again.

Installation

Installing a Cinderella toilet is simple and requires no external tanks or water connection. All you need to do is install an intake/outlet ventilation system, but it is important that you follow Cinderella Eco Group’s instructions to ensure good operational reliability and long service life.

Approved product

Cinderella Comfort has all necessary approvals and certifications within its product group. This is extremely important and gives you peace of mind as a customer. Read more about our certifications here.

Features Comfort

A high quality product made in

waste
- No water supply required (no indoor or outdoor tank)
